Dear Mr. Honohan:

The Texas Commission on Environmental Quality (TCEQ) Industrial and Hazardous Waste (I&HW) Permits Section has reviewed your NOC/CfPT and RCRA Periodic Test Results dated December 10, 2013 and revised by your electronic mails dated July 21, 2014 and September 5, 2014, submitted for Train I and Train II Incinerators. The NOC/CfPT Results were submitted to demonstrate compliance with the Hazardous Waste Combustor Maximum Achievable Control Technology (HWC MACT) Standards in Title 40 Code of Federal Regulations (CFR), Part 63, Subpart EEE for existing hazardous waste incinerators. The RCRA Periodic Test Results were submitted in accordance with Provision V.H.6.b. of Hazardous Waste Permit No. 50089.

Our evaluation indicates that Train I and Train II Incinerators comply with the aforementioned regulations and the requirements in Provision V.H.6.b. of the permit while operated under the limitations described in the permit and your previous NOC dated May 25, 2011 and revised on June 24, 2011 (see TCEQ conditional approval letter dated February 26, 2013). Please note that your NOC is subject to Finding of Compliance, in accordance with 40 CFR Section 63.1206(b)(3), by the Environmental Protection Agency Region VI, the current federal authority for the HWC MACT standards.

Questions regarding this matter should be directed to Mr. Vahab Haghighatian, P.E., P.G. of the I&HW Permits Section at (512) 239-6081. If you respond in writing, please include mail code MC 130 in the mailing address.

Sincerely,

Earl Lott, Director
Waste Permits Division
